PROFESSIONAL SUMMARY

B.Tech CS graduate with hands-on experience in AI product development and operations. Built and deployed 3 end-to-end AI products (LLM recommendation engines, RAG chatbots, automated review analytics) and supported 25+ client onboardings. Currently pursuing an AI Product Management Fellowship combining structured product sprints with independent build hours. Seeking AI PM or Analyst roles bridging technical depth with user-centric product thinking and data.

EDUCATION

Guru Nanak Institute of Technology

Bachelor of Technology (B.Tech) in Computer Science Engineering – (CGPA 8.82/10)

Kolkata, India

2021 – 2025

EXPERIENCE

AI Product Management Fellowship — NextLeap

Feb 2026 – Present

Intensive fellowship combining structured milestone sprints with independent AI product build hours

Product Sprint — ChatGPT Voice Module Adoption

- Mapped the end-to-end user journey for ChatGPT Mobile's Voice Module, identifying **3 key drop-off points** in the activation funnel using systems-thinking frameworks and outcome-driven mapping.
- Conducted primary user research across **30+ mobile users**, synthesised findings into problem statements using JTBD Framework and affinity mapping.
- Authored a PRD with 3 feature interventions prioritised via RICE, defining **North Star metric (weekly active voice sessions)** and 4 supporting KPIs for activation, retention, and engagement.

Independent Build Hours — 3 Shipped AI Products

- Built and deployed **3 full-stack AI products** — LLM restaurant recommendation engine, RAG mutual fund chatbot, and AI app-review insights pipeline — end-to-end from problem scoping to production deployment.
- Shipped via Vercel, Hugging Face Spaces, and Docker with **CI/CD automation via GitHub Actions** using FastAPI, Groq, ChromaDB, and MCP Protocol.

Operations Associate — QSS Quick Service Solutions WLL

Jun 2025 – Present

Operational data, reporting, and client onboarding across a partner ecosystem of 20+ accounts

- Designed Excel-based tracking systems for deliverables, performance, and timelines across **20+ partner accounts**, improving visibility for a 10-member cross-functional team.
- Delivered **10+ operational reports monthly** with full accuracy over 6+ months, synthesising data into leadership reviews informing quarterly decisions.
- Standardised onboarding workflows enabling structured handoffs for **25+ client integrations** with zero process lapses.
- Identified operational bottlenecks through 6+ months of trend analysis, surfacing **actionable insights** driving execution improvements across quarterly review cycles.

PROJECTS

Zomato AI Recommendation System | Next.js 14 · FastAPI · Groq LPU · Pandas · PyArrow · Pytest ([Repo](#))

Engineered an LLM-powered restaurant recommendation engine processing **9,000+ restaurant records** with PyArrow, delivering personalised recommendations via Groq's LPU inference in **sub-2s response times**. Achieved **95%+ test coverage** via Pytest ensuring production-grade reliability.

Groww Mutual Fund FAQ Chatbot | Next.js 15 · FastAPI · Groq (Llama 3.3 70B) · ChromaDB · Playwright · GitHub Actions ([Repo](#))

Built a facts-only RAG chatbot with a **10-phase pipeline** (scraping, chunking, embeddings, hybrid search). Indexed **500+ scheme data points** with daily auto-refresh, achieving **<3s query resolution** and **zero-hallucination** on out-of-scope queries. Deployed on Vercel + Hugging Face Spaces via Docker.

Groww — App Review Insights Analyser | TypeScript · Node.js · FastAPI · Groq · Streamlit · MCP · GitHub Actions ([Repo](#))

Automated pipeline ingesting **1,000+ app reviews** over 8–12 weeks, clustering into **5 actionable themes** with auto-generated stakeholder pulse notes. Reduced manual analysis effort by **~80%** via dual-model Groq architecture, PII scrubbing, and Google Docs/Gmail delivery. Streamlit dashboard with **zero-touch weekly automation**.

SKILLS

Product: Roadmapping, PRD Writing, User Research, RICE Prioritisation, KPI Definition, Wireframing (Figma), First-Principle Thinking

AI & Agents: Multi-Agent Systems, RAG Pipelines, MCP Protocol, LLM API Integration, Voice/Chat AI Agents, Prompt Engineering

Technical: Python, SQL, FastAPI, Next.js, TypeScript, Node.js, REST APIs, Docker, CI/CD (GitHub Actions)

Data & Analytics: Power BI, Google Analytics, Pandas, Excel (Advanced), Google APIs, M365

Automation: n8n, Zapier, Cursor, Claude Code, Replit, Streamlit

CERTIFICATIONS

- Business Writing by University of Colorado – June 2022 ([link](#))
- Advanced Excel by Internshala Trainings – June 2020 ([link](#))
