

MILESTONE 1

Systems Thinking & Mapping Product Outcomes

Increase the Usage of Voice Input on the ChatGPT
Mobile App

SK AKASH ALI

Voice Tech Adoption Funnel & Market Outlook | Smartphone Base, INDIA

A. Adoption Funnel

B. Market Projection

Adoption Drivers:

- Regional language support
- Smartphone-first internet
- AI improvements
- Hands-free convenience

KEY INSIGHT: Voice is mainstream — 6 in 10 smartphone users already use voice features. Yet ~300M users remain untapped, presenting massive growth potential.

Competitive Analysis & Product Outcomes for ChatGPT Voice

A. Competitor Snapshot (India Mobile)

Assistant	Reach	Strength	Key Gap
Google Assistant	Highest	Daily commands	Limited conversational depth
Alexa	Moderate	Device automation	Lower mobile-first adoption
Siri	iPhone-only	Apple ecosystem	Limited outside Apple

B. Pain Points to Address for ChatGPT Voice Assistant

📌 Low discovery — users don't know the voice feature exists

📌 Accent & regional language accuracy issues

📌 Privacy concerns in public/shared spaces

📌 No cross-session context carry-over

📌 Battery & UX friction vs. simple command interfaces

ChatGPT Voice Assistant UX

- Conversational, context-aware
- Natural language generation
- Learning & creativity use cases
- Multi-turn dialogue within session

Product Outcomes Needed

- Improve discoverability & onboarding
- Enhance accuracy for Indian accents
- Privacy-centric on-device processing
- Faster response for quick tactical tasks
- Context retention across sessions

Why Product Outcome Matters | KPI Tree to Increase Voice Usage on ChatGPT

KPI TREE

WHY IT MATTERS

⚡ Competitive Differentiation

Generative voice is ChatGPT's edge over Google & Siri — but only if users discover & adopt it.

📊 Business Impact

Higher voice DAU → stronger monetization, better retention curves & premium upsell.

🚀 Drives Engagement & Retention

Voice users engage more naturally and return more often — it's a stickiness multiplier.

🌍 Unlocks a 300M+ Untapped Market

Low-literacy & vernacular users in India prefer voice over typing — a massive growth lever.
